THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

EDITORS AND PROPRIETORS,

JAMES D. DANA, B. SILLIMAN, AND E. S. DANA.

ASSOCIATE EDITORS,

PROFESSORS ASA GRAY, WOLCOTT GIBBS AND
E. C. PICKERING, OF CAMBRIDGE,

PROFESSORS H. A. NEWTON, S. W. JOHNSON,
GEO. J. BRUSH AND A. E. VERRILL,
OF NEW HAVEN.

THIRD SERIES.

VOL. XIII.—[WHOLE NUMBER, CXIII.]

Nos. 73—78.

JANUARY TO JUNE, 1877.

WITH FOUR PLATES.

NEW HAVEN: EDITORS.
1877.

ERRATTA.

On page 156, 17th line from bottom, for loss read top.
On page 156, 5th line from bottom, for *Caryatus* read *Caryatis.*
On page 156, 4th line from bottom, for *Dosenia* read *Dosinea.*
On page 157, 6th line from top, for *Cyclameria* read *Cyprimeria.*
On page 209, 3d line from top, for Norris read Morris.
On page 234, 23d line from bottom, for J. Price Ralston read J. Grier Ralston.
On page 267, 5th line from top, for lobes read lobe.
On page 270, 4th line from top, for general read genal.

PRINTED BY TUTTLE, MOREHOUSE & TAYLOR, 371 STATE STREET.

CONTENTS OF VOLUME XIII.

NUMBER LXXIII.

Page

ART. I.—Contributions to Meteorology, being results derived from an examination of the Observations of the United States Signal Service, and from other sources; by ELIAS LOOMIS, ... 1

II.—On some Points in Connection with Vegetation; by J. H. GILBERT, ... 20

III.—Observations on a property of the Retina, first noticed by Tait; by OGDEN N. ROOD, ... 32

IV.—On grains of Metallic Iron in Dolerytes from New Hampshire; by GEORGE W. HAWES, ... 33

V.—On certain Phenomena of Binocular Vision; by FRANCIS E. NIPHER, ... 35

VI.—Notes on the Vespertine Strata of Virginia and West Virginia; by WILLIAM M. FONTAINE, ... 37

VII.—On the production of Transparent Metallic Film by the Electrical Discharge in exhausted tubes; by ARTHUR W. WRIGHT, ... 49

APPENDIX.—Photographs of the Spectra of Venus and α Lyræ. Note by Prof. HENRY DRAPER, ...3d page of cover.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—So-called Crystallized Boron, HAMPE, 55.—Constitution of the Phosphates, BERTHELOT and LOUGUININE: Critical Point of Liquid Carbon Dioxide, HARTLEY, 56.—Spectra of Indium, CLAYDEN and HEYCOCK: Preparation of Hydroquinone, WESELSKY and SCHULER, 57.—Gelsemium sempervirens, SONNENSCHEIN: Kurze allgemeine Einleitung zu den aromatischen Nitro-verbindungen von PETER TOWNSEND AUSTEN: Mariotte's Law, 58.—Physical Properties of Gallium: Plasticity of Ice, Prof. BIANCONI, 59.—Velocity of Electricity, Dr. SABINE, 60.—Chemistry and Physics in America, Prof. JOHN W. DRAPER, 61.—Prof. Draper's researches, 67.

Geology and Mineralogy.—Explorations made under the direction of F. V. HAYDEN, in 1876, 68.—Geological Survey of Kentucky, 74.—The American Bison, living and extinct, J. A. ALLEN: Second Geological Survey of Pennsylvania, 75.—Glacial Phenomena of North America, Prof. OTTO TORELL, 76.—Note on the Glacial era, J. D. DANA, 79.—Monograph of American Trilobites, A. W. VOGDES, 80.—Outline of the Geology of Canada, E. J. CHAPMAN: Origin of Forest and Prairie regions: Great Ice Age and its relation to the Antiquity of Man, JAMES GEIKIE, 81.

Botany and Zoology.—Date of Publication of Elliott's Botany of South Carolina and Georgia, 81.—Homogone and Heterogone (or Homogonous and Heterogonous) Flowers, 82.—Geographical Statistics of the European Flora, 83.—Wild Flowers of America, ISAAC SPRAGUE, 84.—Report upon Geographical and Geological Explorations and Surveys, west of the One-hundredth Meridian, Lieut. Geo. M. WHEELER, 85.

Astronomy.—The secular change of Magnetic declination in the United States, and other parts of North America, CHARLES A. SCHOTT, 85.—Investigation of Corrections to Hansen's Tables of the Moon, S. NEWCOMB: Knobel's Reference Catalogue of Astronomical Papers and Researches, 87.

Miscellaneous Scientific Intelligence.—Notes on Assaying and Assay-Schemes, PIERRE DE PEYSTER RICKETTS: Alcohol Strength of Australian Wines, 87.—*Obituary.*—F. B. Meek: David Forbes, 88.

NUMBER LXXIV.

Page

ART. VIII.—Astronomical Observations on the Atmosphere of the Rocky Mountains, made at elevations of from 4,500 to 11,000 feet, in Utah and Wyoming Territories and Colorado; by HENRY DRAPER, ... 89

IX.—Photographs of the Spectra of Venus and α Lyræ; by HENRY DRAPER, ... 95

X.—On Dinitroparadibrombenzols and their Derivatives; by PETER TOWNSEND AUSTEN, ... 95

XI.—On some Points in connection with Vegetation; by J. H. GILBERT, ... 99

XII.—Orbit of the planet Urda (167); by C. H. F. PETERS, 112

XIII.—Principles of Compensation in Chronometers; by J. B. JAMES, ... 113

XIV.—Notes on the Vespertine Strata of Virginia and West Virginia; by WILLIAM M. FONTAINE, ... 115

XV.—On the Chemical composition of the flesh of Hippoglossus Americanus; by R. H. CHITTENDEN, ... 123

XVI.—Notice of Darwin on the Effects of Cross- and Self-Fertilization in the Vegetable Kingdom; by ASA GRAY, 125

XVII.—Note on Microdiscus speciosus; by S. W. FORD, ... 141

XVIII.—On Water Courses upon Long Island; by ELIAS LEWIS, Jr., ... 142

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Purification of Hydrogen gas, 146.—Hypovanadic Oxide and its Compounds, CROW: Plato- and Diplato-nitrites, NILSON, 147.—Behavior of Palladium in the Alcohol flame, WÖHLER: Two new Dichlornaphthalenes: Emodin from the bark of Rhamnus frangula, LIEBERMANN and WALDSTEIN, 148.—Phthaleins of Tertiary aromatic bases, FISCHER: Standard Meter, M. G. MATTHEY, 149.—Films of Water, TAYLOR: Fog-Signals, HENRY, 151.—The Siphon Recorder and Automatic Curb-sender, 152.

Geology and Mineralogy.—Report on the Transportation route along the Wisconsin and Fox Rivers, Wisconsin, G. K. WARREN, 152.—Ice work now going on in Newfoundland, S. MILNE: Glaciation of the Shetland Isles, JOHN HORNE, 155.—Note on the relations of Balanus Estrellanus of California Miocene, T. A. CONRAD, 156.—Stromatopora: Geological Survey of Victoria, R. BROUGH SMYTH: Fossil Elephant in Washington Territory, WM. O. MATZGER: Mesozoic Fossils, vol. i, J. F. WHITEAVES: Miocene in Southern New Guinea, C. S. WILKINSON, 157.—Recherches sur les Fossiles Paléozoiques de la Nouvelle Galles du Sud (Australie), DE KONINCK, 158.—Syenitic mountains of Ditro, etc., G. VOM RATH: "Greenstones" of Western Cornwall, J. A. PHILLIPS, 159.—Petrographische Studien an den Melaphyrgesteinen Böhmens, E. BORICKY: Minerals of New South Wales, A. LIVERSIDGE: Mineralogical Magazine and Journal of the Mineralogical Society of Great Britain and Ireland: Prospectus of the "Zeitschrift für Krystallographie und Mineralogie," 162.

Botany and Zoology.—Ulothrix zonata, ARNOLD DODEL, 163.—De Copulatione Microzoosporarum Enteromorphæ compressæ, J. E. ARESCHOUG: Wyville Thomson on some of the Echinoderms of the "Porcupine" and "Challenger" Expeditions, 164.—Zoology of the Challenger Expedition, A. AGASSIZ, 165.—Rate of Growth of Corals: Bulletin of the Nuttall Ornithological Club, 166.

Astronomy.—Meteor of Dec. 21st, 1876, 166.

Miscellaneous Scientific Intelligence.—Bressa Prize, of the Turin Academy of Sciences, 167.—Annual Report of the Board of Regents of the Smithsonian Institution for 1875: Theory of Sound in its relation to Music, PIETRO BLASERNA, 168.

NUMBER LXXV.

Page

ART. XIX.—In Memoriam.—Fielding Bradford Meek,..... 169

XX.—Notes on the Age of the Rocky Mountains in Colorado; by A. C. PEALE,..... 172

XXI.—On some Points in connection with Vegetation; by J. H. GILBERT, ... 181

XXII.—Apparatus for quantitative Fat-extraction; Composition of the Sweet Potato; Composition of Maize Fodder; by S. W. JOHNSON,..... 196

XXIII.—Meteoric Stone of Rochester, Fulton Co., Indiana; by CHARLES UPHAM SHEPARD, ... 207

XXIV.—Examination of the Waconda Meteoric Stone, Bates County Meteoric Iron and Rockingham County Meteoric Iron; by J. LAWRENCE SMITH, ... 211

XXV.—Certain features of the Valleys or Water-courses of Southern Long Island; by ELIAS LEWIS,..... 215

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On Rock-crystal Balance-beams, Thermometers, and graduated Circles, STEIN, 216.—Evolution of Hydrogen at both Electrodes in Electrolysis, ELSAESSER: Relation of the Molecular weights of Chemical substances to their Heat-absorbing power, AYMONNET: On the Existence of Solid Particles of Carbon in Luminous Flames, HEUMANN, 217.—Alcohol from the leaves of the Sugar-beet, PIERRE: On the Detection of ordinary Alcohol in Wood Spirit, BERTHELOT: Synthesis of Allantoin, GRIMAUX, 218.—Rhodein, a new test for Aniline, JACQUEMIN: Sensitive Flames, R. H. RIDOUT, 219.—Theory of Luminous Flames, KARL HINMANN: Influence of Pressure on Combustion, M. WARTHA, 220.—Large Induction Coil, WM. SPOTTISWOODE, 221.—Lectures on some Recent Advances in Physical Science, with a Special Lecture on Force, P. G. TAIT, 222.

Geology and Mineralogy.—Grand'eury on the Carboniferous Flora, 222.—Memoirs of the Geological Survey of Kentucky, N. S. SHALER, 226.—Report of a Reconnaisance from Carroll, Montana Territory, WM. LUDLOW, 228.—The Yellowstone National Park and the Mountain regions of portions of Idaho, Nevada, Colorado and Utah, F. V. HAYDEN, 229.—Report on the Geological Survey of Alabama, EUGENE A. SMITH: Annual Report of Progress and Results of the Wisconsin Geological Survey, T. C. CHAMBERLIN, 230.—Report of the State Geologist of New Jersey, G. H. COOK: Salt Region of Goderich, Canada, 231.—Glaciers in the Urals during the Glacial Era, 232.—Trilobites, C. D. WALCOTT: Geology and Paleontology of the Argentine Republic, H. B. GEINITZ, 233.—Mémoire sur les Caractères Minéralogiques et Stratigraphiques des Roches, etc., CH. DE LA VALLÉE POUSSIN et A. RENARD: Note on new localities of the Columbic acid minerals, and two new Columbates, J. LAWRENCE SMITH: Bulletin of the Bussey Institution, 234.—Heights on Long Island, 235.

Botany and Zoology.—Dextrorse and Sinistrorse, 236.—Botanical Necrology of 1876, 237.—Mistletoe, 238.—Observations on Rhizopods, LEIDY, 239.—Habits of Formica rufa, MCCOOK, 241.—The Rhynchophora of America, north of Mexico, JOHN L. LECONTE: A new Echidna from New Guinea, 242.

Astronomy.—A New Planet, C. H. F. PETERS: Instruments and Publications of the U. S. Naval Observatory, 242.—Note of the recent fall of three Meteoric Stones, J. LAWRENCE SMITH, 243.

Miscellaneous Scientific Intelligence.—Topographical Survey of the State of New York: Tour of the Great Lakes: Elements of Physics, NEIL ARNOTT: Metric System, 244.—Illinois Museum of Natural History: Huronian rocks of the Lake Superior region: Third Annual Report of the Commissioner of Agriculture of the State of Georgia: The Applications of Physical Forces, AMEDÉE GUILLEMIN, 245.

Obituary.—Rear Admiral Charles Henry Davis: Rear Admiral Charles Wilkes: Alfred Smee: J. C. Poggendorff, 246.

NUMBER LXXVI.

Page
ART. XXVI.—On the Sensation of Color; by C. S. PEIRCE,.. 247
XXVII.—Note on the Binocular Phenomena observed by Professor Nipher; by J. LECONTE, ... 252
XXVIII.—Revision of the genus *Belemnocrinus;* by CHAS. WACHSMUTH and FRANK SPRINGER, ... 253
XXIX.—Thorpe's and Bunsen's methods for the Estimation of Nitrogen in Nitrates; by S. W. JOHNSON, ... 260
XXX.—Westfield during the Champlain Period; by J. S. DILLER, ... 262
XXX*bis*.—New Embryonic Forms of Trilobites; by S. W. FORD. With a plate, ... 265
XXXI.—The Winds of the Globe; or the Laws of Atmospheric circulation over the surface of the Earth,.. 273
XXXII.—On some Nitro-derivatives of Diphenylamine; by P. T. AUSTEN, ... 279
XXXIII.—Note on Mineral Analysis; Note upon some Fluorides; Note on Molecular Volumes; by F. W. CLARKE, 290
XXXIV.—On the identity of the so-called Peganite of Arkansas with the Variscite of Breithaupt and Callainite of Damour; by A. H. CHESTER, ... 295
XXXV.—On a fibrous variety of Sepiolite from Utah; by A. H. CHESTER, ... 296
XXXVI.—On Dr. Peale's Notes on the Age of the Rocky Mountains in Colorado; by J. J. STEVENSON, ... 297

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Velocity of Chemical Reactions, BOGUSKI and KAJANDER. 299 —Equivalence of Nitrogen, LADENBURG and STRUVE: Action of fuming Nitric Acid on Coal Gas, AKESTORIDES: Oxidized platinic sulphide, E. v. MEYER, 301.—Preparation of Glycollic acid by reduction of oxalic acid, CROMMYDIS: Decomposition of the Oil of Turpentine at high Temperatures, SCHULTZ: Constituents of Beech-wood Tar-creosote, TIEMANN and MENDELSOHN, 302.—Measurement of High Pressures, M. L. CAILLETET: Diathermaneity of Metals and Paper, M. AYMONNET, 303.—Increase of Weight by Combustion, M. V. MEYER: Absorption of Light, M. LIPPICH: Lippmann's Electrometer, 304.—Entwickelung der theoretischen Ansichten über die gepaarten Schwefelverbindungen, von G. A. SMYTH, 305.

Geology and Mineralogy.—Age of the Crystalline Rocks of Wisconsin, R. IRVING, 307.—Microscopical Petrography, F. ZIRKEL, 309.—Connecticut Valley Helderberg, C. H. HITCHCOCK, 313.—On Geological Time, T. M. READE, 314.—The Carboniferous and Permian a continuous formation in Bohemia: Revue de Géologie pour les Années 1874–75, M. DELESSE et M. DE LAPPARENT, 315.—A fossil Saurian Vertebra from the Arctic Regions, A. L. ADAMS: Fossil Vertebrates from the Fort Union beds of Montana, E. D. COPE, 316.—A Text-book of Mineralogy, with an extended Treatise on Crystallography and Physical Mineralogy, E. S. DANA: Second Preliminary Report on the Mineralogy of Pennsylvania, F. A. GENTH, 317.—Brief Notices of some newly described minerals, 318.—Zeitschrift für Krystallographie und Mineralogie: Ueber der inneren Zusammenhang der verschiedenen Krystallgestallten des Kalkspaths, F. SCHARFF, 319.—Chemistry and Composition of the Porcelain and Porcelain-rocks of Japan, WURTZ, 320.

Botany and Zoology.—Dictionnaire de Botanique, M. H. BAILLON: Flora Fossilis Arctica; Die Fossile Flora der Polarländer, O. HEER, 320.—Proceedings and Transactions of the Nova Scotia Institute of Natural Science: Lady Smith, 321. —Joseph de Notaris: Recent Papers on Fungi: Destruction of Forest Trees by Mistletoe, E. S. CROZIER, 322.—Median and Paired Fins, a contribution to the history of Vertebrate Limbs, J. K. THACHER, 323.

Astronomy.—Elements of Borelly's Comet, A. N. SKINNER, 323.—Photographic Spectra of Stars, W. HUGGINS, 324.—Satellites of Jupiter, D. P. TODD, 325.
Miscellaneous Scientific Intelligence.—Geological Society of London: Bulletin of the Buffalo Society of Natural Sciences, 325.—California State Geological Society: Meteorology of Golden, Colorado: American Microscopical Society: Structure of Precious Opal: Shoal in the Atlantic, 326.—*Obituary.*—Wolfgang Sartorius von Waltershausen, 326.

NUMBER LXXVII.

Page

ART. XXXVII.—On Vortex Rings in Liquids; by J. TROWBRIDGE, ... 327
XXXVIII.—An account of the Discoveries in Vermont Geology of the Rev. AUGUSTUS WING; by JAMES D. DANA, .. 332
XXXIX.—Notes on the History of *Helianthus tuberosus*, the so-called Jerusalem Artichoke; by J. HAMMOND TRUMBULL and ASA GRAY, ... 347
XL.—A new Investigation of one of the Laws of Friction; by A. S. KIMBALL, ... 353
XLI.—Examination of American Columbic Acid Minerals; by J. LAWRENCE SMITH, ... 359
XLII.—On the Sensitiveness to Light of various Salts of Silver; by M. CAREY LEA, ... 369

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Chemical Actions of the Silent Electric Discharge, BERTHELOT, 371.—Is Nitrogen oxidized by Ozone in the presence of Alkalies? BERTHELOT, 372.—Equivalence of Nitrogen, VICTOR MEYER: A new metallic element, Neptunium, HERMANN, 373.—Phosphorescence of Organic Liquids, RADZISZEWSKI: Melezitose, VILLIERS, 374.—Tri-substitution derivatives of Benzol, E. F. SMITH, 375.—Kinetic Theory of Gases, M. BOLTZMANN: Vowel "Clang," M. AUERBACH, 378.—Ultra Red Spectrum, M. E. BECQUEREL, 379.—Fluorescence, M. LOMMEL: Equilibrium of heterogeneous substances, J. WILLARD GIBBS, 380.
Geology and Mineralogy.—The Lœss of the Rhine and Danube, T. BELT, 383.—Thickness of the Palæozoic rocks of Central Pennsylvania, 384.—Lower Helderberg rocks of Port Jervis, N. Y., S. T. BARRETT, 385.—Geological and Geographical Survey of the Territories, 387.—Note on the Criticism of Prof. Stevenson, A. C. PEALE, 388.—American Palæozoic Fossils: Palæontographica: Analyses of Japanese Porcelain-rocks, H. WURTZ, 389.—Hermannolite of Shepard, and Samarskite of North Carolina, Prof. DELAFONTAINE, 390.
Botany and Zoology.—Right-handed and Left-handed Relations in Space: Observations sur l' enroulement des Vrilles, DECANDOLLE, 391.—Date of the parts of Elliott's Botany: Onion-Smut, W. G. FARLOW, 392.—Botanical Instruction at Harvard University, 393.—Classification and Terminology in Monocotyledons, 394.—The Various Contrivances by which Orchids are fertilized by Insects, 395.
Astronomy.—The New Star in Cygnus, 395.—Planets recently discovered, 397.—Publications of the Private Observatory of Lord Lindsay, Dun Echt (Aberdeen), 398.—La Luce Zodiacale, sue Leggi e Teoria Cosmico-Atmospherica, dedotte dalle Osservazione di G. Jones: Comets in 1877, 399.—Observations of Comets 1877*b*. and 1877*c*. at the Observatory of the Sheffield Scientific School, 400.
Miscellaneous Scientific Intelligence.—Appearance and Migration of the Locust in Manitoba and the Northwest Territories, summer of 1875, G. M. DAWSON, 401.—The Telephone: Scientific Expedition to the Rocky Mountain Region from Williams College: Scientific Expedition and Summer School of Butler University, Irvington, Indiana: Report of the Chief of Engineers to the Secretary of War, for the year 1876, 402.—Height of "West Hills," Long Island: Strength and Determination of the Dimensions of Structures of Iron and Steel with reference to the latest Investigations, 403.—The Chemist's Manual: Astronomical Myths based on Flammarion's History of the Heavens, 404.

NUMBER LXXVIII.

Page

ART. XLIII.—An account of the Discoveries in Vermont Geology of the Rev. AUGUSTUS WING; by JAMES D. DANA, 405

XLIV.—On Barite crystals from the Last Chance Mine, Morgan County, Missouri; and on Göthite from Adair County, Missouri; by G. C. BROADHEAD, 419

XLV.—Estimation of Chromium and Aluminium in Steel and Iron; by ANDREW A. BLAIR, 421

XLVI.—On the Chemical Composition of Triphylite, from Grafton, New Hampshire; by SAMUEL L. PENFIELD, 425

XLVII.—On a new Mode of Manipulating Hydric Sulphide; by JOSIAH P. COOKE, JR., 427

XLVIII.—Report on the Physical Investigations carried on by P. Herbert Carpenter, B.A., in H.M.S. "Valorous," during her Return Voyage from Disco Island in August, 1875; by WILLIAM B. CARPENTER, 437

XLIX.—On the influence of Geological Changes on the Earth's Axis of Rotation; by GEORGE H. DARWIN, 444

L.—On a Base derived from a Waste-product in the Aniline Manufacture; by C. LORING JACKSON, 449

LI.—On an association of Gold with Scheelite in Idaho; by B. SILLIMAN, 451

LII.—Ninth Report of the British Association Committee, appointed for the purpose of investigating the Rate of Increase of Underground Temperature downward in various Localities of Dry Land, and under Water; by Prof. EVERETT, 452

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Iodine Trichloride, CHRISTOMANOS, 461.—The Atomic Weight of Selenium, PETTERSON and EHMAN: Trihydroxylantimonic acid and Antimonyl chloride, DAUBRAWA: The Constitution of Cyanamide, FILETI and SCHIFF, 462.—Potassium triiodide, JOHNSON: Ethyl-mercaptan and its Derivatives, CLAESSON: The Synthesis of Coumarin, TIEMANN and HERZFELD: The Decomposition of Glyoxalyl-urea, MEDICUS, 463.—Two new Alkaloids, Strophantine and Ineine, HARDY and GALLOIS: Occurrence of Copper normally in the Blood of Wild Animals, CLOËZ: Is Glass impervious to Gases? G. QUINCKE, 464.—Polarization of the Rainbow, M. J. DECHANT, 465.—The Radiometer: Fluorescence, M. E. LOMMEL, 466.—Electricity and the Electric Telegraph, G. B. PRESCOTT, 467.

Geology and Natural History.—Annual Report on the Geographical Surveys west of the 100th Meridian, G. M. WHEELER: Geological and Geographical Survey of the Territories, F. V. HAYDEN: Contributions from the Laboratory of the University of Missouri, 468.—Organogeny of the Female Flower of Gnetum Gnemon, O. BECCARI, 469.—The Paleontological Origin of those trees and shrubs indigenous to the south of France, C. MARTINS: ALEXANDER BRAUN, 471.—Notice of Recent Works on Vegetable Paleontology, L. LESQUEREUX, 472.—Preliminary Note on the Development of Organisms in Organic Infusions, JOHN TYNDALL, 477.—On Heat as a Germicide when discontinuously applied, JOHN TYNDALL, 480.

Miscellaneous Scientific Intelligence.—National Academy of Sciences, 481.—Excrementitious deposits in the Rocky Mountain region, H. W. HENSHAW: Fourth Annual Report of the New Jersey State Board of Agriculture: Primer of Chemistry, including analysis, A. VACHER, 482.
